Lead Tech Architect:	AG (AI Engineering Partner)
Document Version:	Version 1.0 Final Master Specification
Date of Issue:	August 2026

1. Executive Summary & Brand Vision

Meethi Kahani (Mithi Kahani) is a high-end Direct-To-Consumer (D2C) artisanal cookie bakery brand operating in the Mumbai Metropolitan Region (MMR). The brand combines authentic traditional heritage recipes with modern luxury packaging, offering 100% Pure Eggless freshly baked cookies delivered directly to consumers' doorsteps.

Core Strategic Pillars:

- **100% Pure Eggless Guarantee:** Essential brand USP catering to India's massive vegetarian market.
- **2-Year Single Product Focus:** 100% focused on Cookies for Years 1-2 (Fudges and Cupcakes deferred to Year 2+ expansion).
- **Exact Brand Palette:** Deep Crimson Red (#9A2222), Soft Vanilla Linen (#FAF5EE), Dark Cocoa (#3D2314).
- **Strict No-Popups Policy:** Zero intrusive popups, ensuring a serene, ultra-luxurious customer experience.
- **Single Master Stock Architecture:** All D2C orders (Personal, Gifting) draw inventory from a single cookie stock pool in the DB.

2. Customer Purchasing Tracks & Pricing Strategy

Track Name	Target Audience	Core Features & Mechanics
Personal Track (/)	Single Buyers & Daily Cravings	Standard single cookie purchases & box orders from single stock pool.
Gifting Track (/gifting)	Festive, Birthday, & Gift Buyers	Build-Your-Own Gift Box, custom wax-sealed gift cards, recipient video/voice QR code.

Pricing & Discount Rule: Personal and Gifting are strictly Order Types (categories of purchase), NOT discount tags. Discounts are exclusively promo codes created by Admin in the Offers Manager.

3. Technical Stack & Component Blueprint

- **Frontend Engine:** React 18 + JavaScript (ES6+) + Vite + Pure Vanilla CSS3.
- **Header Design:** Ultra-Luxury Centered Logo layout -- Left: Hamburger Icon (☰); Center: Meethi Kahani Logo; Right: Account Icon (👤) & Cart Icon (🛒).
- **Cart Architecture:** Slide-Over Cart Drawer featuring a live Cookie Crumb Progress Bar for free shipping.
- **Freshness Ticker:** Hero badge displaying '🍪 [X] Boxes left -- Freshly baked in the last 3 hours'.
- **Dedicated Product Details Page (/product/:slug):** Left 3-4 thumbnail photo gallery; Right side: Title, Price, Add to Cart, Pincode Checker, and 'The Kahani Behind This Cookie' placed at the very end.
- **Sliding Review Carousel:** Positioned right above the Footer displaying 1-5 🍪 Cookie Icon ratings.
- **Payment Gateway:** Pixel-Perfect Dummy Razorpay Gateway Modal for Phase 1 (Simulated UPI QR scan & Card payments).

4. Secret Admin & Seller Operational Portals

- 1. Super Admin Portal (/admin):** Protected by UserID & Password. Features Hero Banner Carousel & Gallery Manager (visual gallery, re-order sequence, native photo uploads), Offers/Coupons Manager, 2-Level Category & Product Catalog Manager, Store Open/Pause Master Switch, Low Stock Threshold Alerts, Staff Roles, Seller Account Creator, Campaign Manager with {Customer_Name} parsing, & Style B Clean Modern GST Tax Invoice Generator.
- 2. Seller / Bakery Kitchen Portal (/seller):** Protected by UserID & Password. Features Live Kitchen Order Queue (Received -> Baking -> Shipped -> Delivered), Stock Replenishment ('+50 Baked'), & Packaging Material Inventory Manager (auto-decrements box tins and wax seals).

5. Dedicated 9-Module Analytics Suite (/admin/analysis)

To keep the main website ultra-fast, all heavy analytics charts and metrics are isolated on **/admin/analysis**:

Module #	Module Name	Core Analytics Functionality
#1	Stock Behavior Analytics	Top Priority: Single stock depletion velocity Week-to-Week & Month-to-Month baking forecast.
#2	Customer Demographics	Mumbai MMR Sub-Zones (South Mumbai, Western Suburbs, Navi Mumbai, Thane, etc.) + Age & Gender breakdown.
#3	Financial & Revenue	Total revenue (■), AOV (■), Personal vs Gifting revenue split, Peak Hours heatmap.
#4	Product Flavor Velocity	Top 5 Best-Selling Cookie SKUs, slow-moving item alerts, & popular Gifting combos.
#5	Promo & Campaign ROI	Promo code redemption performance & WhatsApp campaign ROI tracking.
#6	Customer Retention	Repeat purchase rate % and Kahani Coins ('Kisse') redemption activity.
#7	Delivery & Logistics	Average delivery speed (hours), on-time delivery rate %, & top delivery pincodes.
#8	Cart & Funnel Analytics	Cart abandonment rate % and most abandoned cookie SKUs.
#9	Customer Satisfaction	Average store rating (4.9 ■ out of 5) & sentiment keyword trends.
--	Seller Performance	Cookies baked & restocked per Seller ID + Order packing speed per baker.

6. Database Architecture & Final Readiness

The database utilizes 11 core relational tables: *Customers*, *Admin_Sellers*, *Categories*, *Cookie_Stock*, *Packaging_Stock*, *Hero_Banners*, *Coupons*, *Orders*, *Order_Items*, *Serviceable_Pincodes*, and *Customer_Reviews*.

Addresses are structured across 6 standardized fields (*address_line_1*, *address_line_2*, *town*, *city*, *pincode*, *state*) for fast SQL regional analytics.
