

MEETHI KAHANI

"Every Cookie Tells A Sweet Story"

TEAM MODULE ASSIGNMENTS & WORKFLOW SPECIFICATION

Official Plain-English Work Breakdown for 4-Developer Parallel Vibe Coding

Target Team:	Meethi Kahani 4-Developer Engineering Team
Lead Tech Architect:	AG (AI Engineering Partner)
Architecture Goal:	Zero-Conflict Parallel Vibe Coding via Modular Directory Isolation
Primary Tech Stack:	React 18 + JavaScript + Vite + Pure Vanilla CSS3
Document Version:	Version 1.1 Updated Assignment (Seller Portal -> Dev 2)
Date of Issuance:	August 2026

EXECUTIVE TEAM DIRECTIVE:

This specification establishes the official work breakdown structure for the 4-member development team. **Seller Portal** (`/seller`) has been assigned to **Developer 2** alongside Product Catalog. To guarantee that all 4 developers can write code simultaneously without overwriting each other's work, each team member is assigned an isolated workspace inside `src/modules/`.

1. Master Workspace & Directory Isolation Map

All application features are divided into 7 modular subdirectories inside `src/modules/`. Each developer is given exclusive ownership of specific module directories.

Developer	Assigned Module Directory	Key Features & Component Scope
Developer 1	<code>`src/modules/HeaderNav/`</code> <code>`src/modules/HeroBanner/`</code>	Centered Logo Header, Hamburger Drawer, Cart/Account triggers, Hero Banner Carousel, Freshness Ticker Badge.
Developer 2	<code>`src/modules/ProductCatalog/`</code> <code>`src/modules/SellerPortal/` (NEW)</code>	Category Filter Tabs, Cookie Cards, Out-of-Stock Badges, Dedicated PDP (<code>`/product/:slug`</code>), Multi-photo gallery, 'The Kahani' story section, PLUS Secret Bakery Kitchen Portal (<code>`/seller`</code>), Live Order Queue, Stock Restock (<code>`+50 Baked`</code>), & Packaging Stock Manager.
Developer 3	<code>`src/modules/CartPayment/`</code> <code>`src/modules/CustomerPortal/`</code>	Slide-Over Cart Drawer, Cookie Crumb Progress Bar, Serviceable Pincode Checker, Dummy Razorpay Modal, Reviews Carousel, Customer Account Modal & Live Cookie Order Tracker.
Developer 4	<code>`src/modules/AdminPortal/`</code>	Secret Super Admin Dashboard (<code>`/admin`</code>), Hero Banner Manager, Coupons Manager, 2-Level Nested Catalog Manager, Style B GST Invoice Generator, & Dedicated 12-Module Analytics Dashboard (<code>`/admin/analysis`</code>).

2. Detailed Module Specifications per Developer

DEVELOPER 1: Header Navigation & Hero Showcase

- **HeaderNav** (``src/modules/HeaderNav/``): Implement ultra-luxury centered logo layout. Left: Hamburger menu (■); Center: Meethi Kahani brand logo; Right: Account button (■) and Cart button (■) with dynamic item counter badge.
- **Hamburger Drawer**: Slide-out drawer from left featuring navigation links (``Home``, ``Gifting``, ``Our Story``) and dynamic category tabs.
- **HeroBanner** (``src/modules/HeroBanner/``): Dynamic carousel slider rendering live admin banners. Includes persistent urgency badge: ■ [X] Boxes left — Freshly baked in last 3 hours'.

DEVELOPER 2: Product Catalog & Bakery Kitchen Seller Portal

- **ProductCatalog** (``src/modules/ProductCatalog/``): Dynamic category filter tabs (``Cookies``, ``Gift Sets``, ``Festive Combos``). Render product cards with price (■), pieces count, native image, and out-of-stock badges.
- **Dedicated PDP** (``/product/:slug``): Navigates to dedicated URL. Left side: 3-4 thumbnail multi-angle photo gallery; Right side: Title, Price, Quantity Selector, Add to Cart, Pincode Delivery Checker, and 'The Kahani Behind This Cookie' narrative.
- **SellerPortal** (``src/modules/SellerPortal/``): Secret URL ``/seller``. Features Live Kitchen Order Fulfillment Queue (``Received`` -> ``Baking`` -> ``Shipped`` -> ``Delivered``), Stock Restock (``+50 Baked``), and Packaging Inventory Tracker (auto-decrements Box Tins, Wax Seals, Satin Ribbons).

DEVELOPER 3: Cart, Checkout, & Customer Account Portal

- **CartPayment** (``src/modules/CartPayment/``): Slide-Over Cart Drawer sliding in from right. Features animated Cookie Crumb Progress Bar for free shipping, item subtotal, item removal, and Serviceable Pincode Checker.
- **Dummy Razorpay Payment Modal**: Simulated payment gateway modal (UPI QR scan simulation, Card inputs, instant order confirmation trigger).
- **CustomerPortal** (``src/modules/CustomerPortal/``): Sliding Customer Review Carousel above footer (1-5  rating). User Account Modal (``■``) with Live Animated Cookie Crumb Order Status Tracker (``Placed`` -> ``Baking``    -> ``Out for Delivery``  -> ``Delivered`` ). Includes PDF GST Invoice download button.

DEVELOPER 4: Secret Super Admin Dashboard & Analytics

- **AdminPortal** (``src/modules/AdminPortal/``): Secret URL ``/admin``. Features Hero Carousel Manager (re-order, drag-and-drop, toggle active status), Offers/Coupons Manager, 2-Level Nested Category & Catalog Manager, Style B Clean Modern GST Tax Invoice Generator, and link to ``/admin/analysis``.
- **Dedicated Analytics Suite** (``/admin/analysis``): Heavy 12-Module Analytics dashboard covering Stock Depletion Velocity, Traffic Channel Attribution (Google Organic, WhatsApp, Social), Ecosystem Plugins Performance, Demographics, Revenue, AOV, Flavor Velocity, Promo ROI, Customer Retention, and Delivery Logistics.

3. Golden Rules for Parallel Development & Git Workflow

Rule #	Collaboration Protocol	Technical Enforcement
Rule 1	Strict Directory Isolation	Developers edit ONLY inside their assigned folder under <code>`src/modules/`</code> . Never touch another module folder.
Rule 2	Shared Context Contract	All modules import state from <code>`src/context/StoreContext.jsx`</code> . Never create duplicate local states.
Rule 3	Git Branching Strategy	Create personal branches (<code>`dev1-header`</code> , <code>`dev2-catalog-seller`</code> , <code>`dev3-cart`</code> , <code>`dev4-admin`</code>). Push branch and submit Pull Request.
Rule 4	Daily Sync Protocol	Run <code>`git pull origin main`</code> every morning before starting new code to ensure up-to-date baseline.
